REFRAFORM

More than refractory anchors

WE WORK FOR YOUR SUCCESS!

We specialize in the production of reinforcement and fastening systems for refractory linings for various industries.

Our Mission

Ensuring stability in the operation and maintenance of your process equipment through continuous improvement and the creation of new products that minimize the risk of accidents and provide results that exceed customer expectations.

Our experience — is your desired product

Using modern equipment, we ensure constant quality. In addition, we constantly invest in new technologies and equipment upgrades. All this, combined with a large stock of high-quality stainless and heat-resistant steels, allows us to manufacture any anchor system, ensuring the shortest lead times and high product quality.

In addition to anchor fastenings, we can produce any bent or stamped parts from wire or flat steel, welded structures from heat-resistant steels and alloys.

WE OFFER

We work 24/7

Fast production, shipment possible
within 48 hours after order.

Drawings and CAD

All our sales offers include
technical drawings for each product,
this eliminates ordering errors.

Vinyl caps

All anchors are supplied with
chlorine-free vinyl caps.
Caps are pre-fitted on each anchor.

Delivery terms

We will ensure the delivery of the order
by our own transport
and absolutely free of charge for you.
(Europe and Asia only)

Packing

Free.
